# MSB OR
MSB FIVE?

USER- OR SYSTEM-LED?
A QUESTION OF PROCESSES!

> The products MSB and MSB FIVE from our product portfolio are the basis for a quick and easy implementation of mobile SAP business processes with a focus on mobile logistics and plant maintenance.

CONTENT

But when is MSB or MSB FIVE the product of choice?

We show you decision guidelines for orientation which product supports you optimally in the mobilization of your SAP processes.

SYSTEM-LED PROCESSES

Picking, putaway or physical inventory are classic examples of a system-led process.

Efficient work is clearly in the foreground, screen interaction like swiping or scrolling are counterproductive here. Important information is to be captured at a glance and should be verified in blind flight by scanning and acoustic feedback on your ruggedized device. Then the MSB is the product of your choice for the optimal mobilization of your SAP processes in the logistics environment.

USER-LED PROCESSES

Contrary to the system-led processes are user-led processes in plant maintenance, quality assurance and production.

Situational information display and screen interactions on your smartphone or tablet are of central importance. Here, MSB FIVE is your optimal companion and supports you with intuitive functionalities such as autocomplete, photo, video and file display in the implementation of your mobile SAP processes.

OVERVIEW REQUIRED?

At a glance, our decision matrix shows what matters when choosing the product for the optimal implementation of your mobile SAP process:

		msb	msb FIVE
Device	Ruggedized	+ +	+
	Smartphone	+	+ +
	Tablet	+	+ +
Processes	Scanner intensive	+ +	+
	User-led	+	+ +
	Process-led	+ +	+
	Screen interaction	predominantly process-led	predominantly user-led
Features	Design	pixel based (scalable)	responsive
	Programming	PBO / PAI	REST
	Offline	supported*	supported
	Templates	Logistics (MSTs)	Mobile PM

Suitability: ++ optimal | + case-related | * = version-dependent
